ENDANGERED SPECIES OBSERVER PROGRAM

Dredge B.E. Lindholm

Project Savannah, GA.

DAILY REPORT

Date: 12 / 30 / 00 Loads: 1-6

Area(s) Worked 0+00 - 3+00 / 7+500 - 10+500

Weather Conditions (incl. sea conditions) Clear, wind W/NW 10-20KTS, sea 2-4'

Range of Water Temp., Surface 49° Below Mid-Depth 48°

Condition and Effectiveness of Screening Good

Are there incidents involving endangered or protected species? **Yes** **(No)**

Comments (details of turtle takes or whale sightings, dredged material, screening, biological by-catch, etc.):

Material being dredged is sand, silt & mud

Abiotic material seen was wood, rock, shell, rope, steel & other trash

Biological by-catch was blue crab, horse shoe crab (6), & various small fish.

DAILY REPORT

Date: 01 / 10 / 01 Loads: 72-80

Area(s) Worked Stations: 11+000 - 18+500 / 24+500 - 31+000

Weather Conditions (incl. sea conditions) clear-partly cloudy, NW-SW winds @ 5-25, seas = 1-3

Range of Water Temp., Surface 46°F Below Mid-Depth 46°F

Condition and Effectiveness of Screening Good

Are there incidents involving endangered or protected species? **Yes** **No** (circled)

Comments (details of turtle takes or whale sightings, dredged material, screening, biological by-catch, etc.):

The Georgia DNR sighted a mother/calf pair of Northern Right Whales at 10:39 hours today. Their location was 31°50'N and 80°27'W, which is 16+ miles southeast of our area of operations, therefore no restrictions applied to night time operations.

Dredge moved to section 3 (24+500 - 31+000) at the start of load # 74. There the material consists of silt. Biological specimens retained in screening included: 5 Horseshoe Crabs, 1 Horse conch, Blue Crab, Whelks, Eels, Sea Stars & Wood. Scrap metal and plastics were also retained.

Bridge Watch Summary

WEEKLY SUMMARY

Date: 01/07/01 - 01/13/01 Load Numbers 55-113

Range of Water Temp., Surface 43°-47°F Below Mid-Depth 43°-47°F

Areas Worked (lat/longs, stations) stations: $11+000$ - $18+500$ / $24+500$ - $31+000$

Are there incidents involving endangered or protected species? **Yes** **(No)**

Comments (turtle takes, whale sightings, effectiveness of screening, by-catch, material, other info):

There were no turtle takes and no whale sightings from the dredge, but on 1/10 the Georgia DNR spotted a mother/calf pair of Northern Right Whales @ 31°50'N and 80°27'W. They were nearly 17 miles southeast of our area of operations (beyond the 15 mi limit), thus no night time travel speed restrictions were imposed.

Material in section 2 (stations $11+000$ - $18+500$) consisted of sand, mud, silt, clay + some rock. Material in section 3 (stations $24+500$ - $31+000$) consisted of dark silt.

Biological specimens retained in screening included: 45 Horseshoe Crabs, Whelks, Oysters, Blue Crabs, Horse conchs, Eels, Sea Stars, Olive snails, Spottail, and wood.

*PLEASE NOTE: Observer (M. Piercy) and Dragtender (Mark Freeman) spotted a Bottlenose Dolphin (1125HRS) in distress, tangled in a crab trap line around its tail. At 1130HRS USCG & Chris Slay of Coastwise Consulting were notified of the situation. C. Slay contacted Barb Zoodsma (1140HRS) from Georgia DNR, who in turn contacted Mike Scarsbrook to assist in the release of the animal. With assistance from the Weeks Dredging Crew Boat operator John Pittman & Weeks Field Eng. Mike Ward they were able to remove the line and set the dolphin free at approx 1240HRS. They stayed with the animal for approx 30 min to check it health. The animal swam away in weak but stable condition under it own power. Chris Slay & GA. DNR were notified of the successful rescue at approx. 1320HRS.
